

SECTION 13150

SEWER SERVICE CONNECTIONS

PART 1 - GENERAL

1.1 DESCRIPTION

- A. The work covered by this time shall consist of furnishing and installing service connections in the sewers, and connecting to existing service lines.

PART 2 - PRODUCT

- A. Service connections shall be made at the top or from the side at 45° of the sewer line using 4" and/or 6" diameter pipe as shown on the plans. Service pipe shall be of the same material and quality as the main sewer line.
- B. The service connection shall extend from the sewer line to the existing service line to be tied-in. Connection to existing service line shall be by means of Fernco Flexible Couplings.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Existing service lines shall be kept in service during construction of new sewer main. After new line has been installed, tested, and accepted, all service lines shall be connected to the new sewer line.
- B. Laying of service connection lines shall be in accordance with specifications covering pipe laying as detailed in Section 02623 or 02724 of these specifications.

END OF SECTION 13150.
